1 Maths Intro

1.1 An Introduction to maths equations

Mathematical equations can be created inline as $2 * 4 = 8$ This can include a number of different math symbols as $7 \leq 10$ is true

Putting equation in a separate line as

$$5^2 = 25$$

to call out the formula

1.2 Float: Equations

The first result is shown in equation1

$$24 * 60 = 1440 \tag{1}$$

The second result is shown in equation2

$$24 * 60 * 60 = 86400 \tag{2}$$

The second result is shown in equation3

$$7^4 + 7 * 2 \geq 13 \cup X\alpha 13 \exists \rightarrow complex\ arbitrary\ equation \tag{3}$$
